Articles

What Happens When the Research Ends? Factors Related to the Sustainability of a Technology-Infused Mathematics Curriculum
Barry J. Fishman, William R. Penuel, Stephen Hegedus, and Jeremy Roschelle .......................................................... 329

Using Digital Learning Objects to Introduce Students to the Nature of Models and the Nature of Matter
Brenda Gustafson, Peter Mahaffy, and Brian Martin ........................................ 355

Hands-on, Minds-on or Both? A Discussion of the Development of a Mathematics Activity by Using Virtual and Physical Manipulatives
S. Asli Ozgun-Koca and Thomas Edwards ...................................................... 389

The Use of a Digital Environment to Improve First Year Science Students' Symbol Sense
Sietske Tacoma, Paul Drijvers, and Peter Boon ................................................ 403
Journal of Computers in Mathematics and Science Teaching
Volume 30, Number 3 2011

Articles

The Role of Human-Technology Scaffolding in Changing the Dynamics of the Classroom
Amy M. Grincewicz and Janet Mannheimer Zydny
and Paul Jones ................................................................. 229

Faculty Viewpoints on Teaching Large-enrollment Science Courses with Clickers
James MacArthur, Loretta Jones and Jerry Suits .................. 251

Alien Contact!: Exploring Teacher Implementation of an Augmented Reality Curricular Unit
Rebecca Mitchell .................................................................. 271

Beyond Jeopardy and Lectures: Using Microsoft PowerPoint as a Game Design Tool to Teach Science
Jason Siko, Michael Barbour, and Sacip Toker ..................... 303
Articles

The Effect of Teaching and Learning with Texas Instruments Handheld Devices on Student Achievement in Algebra
Irina Shane Lyublinskaya and Nelly Tournaki ........................................... 5

Examining Teachers’ Enactment of Technological Pedagogical and Content Knowledge (TPACK) in their Mathematics Teaching after Technology Integration Professional Development
Drew Polly.................................................................................................................. 37

Supporting the Development of Mathematical Knowledge for Teaching through Online Asynchronous Collaboration
Jason Silverman........................................................................................................... 61

Teacher-directed Student-use of Technology and Mathematics Achievement: Examining Trends in International Patterns
Yang Wang and Laura O'Dwyer .................................................................................... 79
Articles

Online Homework Effectiveness for Underprepared and Repeating College Algebra Students
David Shane Brewer and Kurt Becker ........................................... 353

A Comparative Study of Partial Credit Assessment and Computer-Based Testing for Mathematics
Marjorie Darrah, Edgar Fuller, and David Miller .......................... 373

Developing a Mobile Physics Learning Environment Based On Physics Misconception Research and e-Learning Design Principles
Young-Jin Lee ............................................................................. 399

An Investigation into Reported Differences Between Online Math Instruction and Other Subject Areas in a Virtual School
Kevin Oliver, Shaun Kellogg, and Ruchi Patel ............................ 417

Employing Technology-Rich Mathematical Tasks in Professional Development to Develop Teachers' Technological, Pedagogical, and Content Knowledge (TPACK)
Drew Polly, Jennifer R. McGee, and Christie S. Martin .............. 455

The Journal of Computers in Mathematics and Science Teaching (ISSN 0731-9258) is published by the Association for the Advancement of Computing in Education (AACE), an international, educational, nonprofit organization. Subscription Rates: (U.S. Funds on U.S. Bank, international money order, AMEX, MC, VISA, or Discover.) Annual subscription rate is $115. Annual Library subscription rate is $195 (U.S.). Articles

The Effect of a Web-Based Homework System on Student Outcomes in a First-Year Mathematics Course
Laurie Lenz ............................................................. 233

Experiences with Extreme Programming
Linda Sherrell, Krishna Bhagavathy, Natasha Velaga, Pavan Vejandla, and Mahesh Satharla ..................................................... 247

Technology In Spherical Geometry Investigations: Reflections On Spontaneous Use And Motivation
Margaret Sinclair ............................................................. 269

Leveraging Cognitive Technology Tools to Expand Opportunities for Critical Thinking on Data Analysis and Probability in Elementary Classrooms
Jennifer M. Suh ..................................................................................... 289

Impact of a Professional Development Program Using Data-Loggers on Science Teachers' Attitudes towards Inquiry-Based Teaching
Sachiko Tosa and Fred Martin .................................................. 303

The Effects of Two Generative Activities on Learner Comprehension of Part-Whole Meaning of Rational Numbers Using Virtual Manipulatives
Jesus Trespalacios .................................................................................... 327
